LAWRENCE, DAVID
Confidence, Kennedy Admin has lost confidence of people who trusted it to deal effectively with problems of country, we are in midst of economic crisis, business world has lost confidence in Pres' advisers; recession is foreseen by economists; to restore confidence of businessmen, whole nation, Pres Kennedy must begin sound economic policy, Jl 2 p 92
Is prayer in schools really barred? Supreme Court has barred "official" prayers, but it hasn't barred prayers, teaching of morality or philosophy of human brotherhood; quotation from Court's ruling, Jl 9 p 100
Job creation, reprinted from issue of February 21, 1958, fallacious doctrines of '30's being urged again, through economic recovery then came only when heavy-goods industries were revived after WW II broke out; study needed of job creation, Jl 16 p 96
Editors of 20 nations attend U N meeting, David Lawrence represents U S, Jl 23 p 10:3

LAWRENCE, DAVID—Contd.
Peace, USSR knows that today West has nuclear weapons which cannot be destroyed by surprise attack, knowledge that nuclear war would be disastrous is exerting powerful influence for peace, bringing in new era of self-restraint, Jl 23 p 96
Why political issue? Pres Kennedy made serious mistake in making Sen vote on his medical-care plan issue in coming cong elections, medicare problem should be considered in light of what has been demonstrated as feasible under voluntary plans, Jl 30 p 88
Fuzzy govt, Pres Kennedy said on July 23 he was going to help elect Dems who supported his program, defeats such as Mr Kennedy has suffered would have been regarded as vote of "no confidence" in countries where parliamentary system prevails, to imitate some of this system's features, ignore rest is perhaps responsible for fuzzy govt we have today, Ag 6 p 104
We need to understand business, there is today lack of understanding of what can make business successful, really brings economic prosperity; example of ambiguous laws cited by Charles R Sligh, Jr, Executive Vice Pres of NAM, in speech on November 20, 1961, Ag 13 p 92
Unmorality, we are living in age in which unmorality in Govt is increasing, theory seems to be that anything is fair in politics, that "end justifies means", so "lush contracts", other favors are awarded for benefit of candidates of own party, Ag 20 p 96
One man, Pres Kennedy's address to nation on August 13 fails to come to grips with fundamental facts of economic life in Amer, yet he tells nation all that it needs to do is to cut taxes, spend more, not worry about deficits; should one man make such vital decisions for us? Ag 27 p 100
Image of Pres, today news confs on TV give us image of Pres which could not have been obtained 50 or 100 yrs ago, what is image of Pres that nation would applaud, long remember? do we like Pres who is politician? S 3 p 96
What kind of world? we have been told that our grand children will live under Communism, what of Khrushchev's grandson's future? will he survive nuclear war? he will have better chance for happiness if USSR establishes incentive system of "people's capitalism" in which people control own private cos, Govt encourages progress; law on operation of new Telstar project good example, S 10 p 118, 117
War ing Russia, after Sec Dean Rusk proposed meeting of foreign mins of Latin-Amer countries, editorial from issue of March 7, 1960, is reprinted, S 17 p 116
Retreat, Pres Kennedy chooses to narrow Monroe Doctrine to cover only "offensive" action against any Amer country, this means that USSR can impose Communist despotism upon this hemisphere without being challenged; example of resoluteness expressed by John Foster Dulles in interview in "Life" on January 16, 1956, S 24 p 136
Advice, when U S Pres now keeps in touch with Sen opinion on foreign policy, is he right to ignore Constitutional obligation to seek Sen's "advice" as well as consent on appointments to high offices such as Supreme Court justice, especially since Supreme Court has duty to rewrite Constitution to conform to spirits of times? comments by Prof C Herman Pritchett, head of Univ of Chicago Political Science Dept, quoted from his book, "The Amer Constitution" published 1959, O 1 p 120
Illegality Breeds Illegality, although desegregation decision of 1954 based on it, Fourteenth Amendment never legally adopted as part of Constitution; Supreme Court has evaded passing on legality of its ratification also on whether assent once given by State can be withdrawn; no legal authority ever granted to executive branch of Fed Govt to manage, operate educational institutions of States, O 8 p 124, 123
Cuba can be saved, mistakes in U S policy toward Cuba in process of correction, unilateral action not desirable, other govts should withdraw recognition, impose economic blockade, unity of action can save Cuba, O 15 p 128
"Lawlessness", parallel between "integration" controversy and prohibition problem? excerpt from article by Deets

LAWRENCE, DAVID—Contd.

Pickett in Washington "Evening Star", October 1958; Supreme Court decision isn't being rigidly enforced, if it were, could have same reaction as in prohibition days; revision of 14th Amendment, to let States handle education problems on local basis, could bring end to present era of "lawlessness", O 22 p 108, 107

$115 billion yrly, excerpts from speech to House on final day of session of 87th Cong by Rep Clarence Cannon, chrmn of House Appropriations Com, commenting on fiscal irresponsibility, O 29, p 124

Advance, Kennedy revised own policy, Monroe Doctrine reaffirmed in October 22 speech, has OAS support; 1930's taught us lesson, U S Govt no longer in retreat; world situation bound to improve if Cuban problem resolved, N 5 p 120

After election, what? now Amer people want impartial leadership to meet problems: abuse of Govt power, decline in Govt morality, economic pitfalls at home, abroad; Govt should eschew politics, begin to function in public interest, N 12 p 128

Political Realism, as in 1960, 1962 elections show conservative coalition of Reps, Dems still strong in Cong, with South holding balance of power in presidential elections; to protect States' rights, prevent Fed Govt centralization, Southern Dems should form again "States' Rights" ticket, making two major parties seek ways, means of winning Southern support, N 19 p 124

It costs very little to give away money, Pres Kennedy donates salary to charity, turns limelight on how govt has been helping wealthy give away money to charities; fed tax laws now greater stimulus to give away than before, lesson to Soviet Union: "in Amer private initiative means huge sums for private charity", N 26 p 128

Conformity by Coercion, integration in public schools is moral, social, political issue, not problem to be settled by bayonets; era of affliction; social relationships; is 14th Amendment valid? philosophical approach; Lincoln on "social equality"; Jefferson on judicial tyranny; facing real issue; reproduced, condensed from July 6, 1956 editorial as result of speech by Nicholas Katzenbach, Deputy U S Attorney Gen before first human-rights college conf, D 3 p 104-101

Without benefit of law, by Pres' recent order on housing he has undertaken to decide social customs in every community, interference with civil rights of workers in factories, one-sided use of executive power, prestige, executive trying to achieve "conformity by coercion", D 10 p 116

Downgrading Constitution, there is cult believing that "spirit" of Constitution is more important than letter of document, Kennedy in August 28 speech states that Constitution written for different period, conditions in nation's history; following "spirit" is doctrine that "end justifies means"; Alexander Hamilton in "The Federalist" felt that ultimate decision should be vested in court, not legislature, but his critics proved prophetic . . . if we are to have unwritten Constitution, people's reps have power, responsibility of rewriting fundamental law, D 17 p 104

Confession of defeat? is proposal for tax cut next yr confession of defeat? true diagnosis of Amer's economic ills is lack of control over labor monopoly which uses strike as weapon to force wage scales out of balance with profits, higher prices, has meant increasing bankruptcies; not "puolic interest" but political interest of Admin; tax reform not helpful unless labor problem solved; to create bigger deficits, to spend more on top of this makes tax cuts devastating blow to self-operating economy, D 24 p 84

Lucky Amer? Kennedy television interview, December 17 reveals vacillating course in Cuban crisis—did we really gamble with our natl safety by allowing 15 nonmilitary advisers to formulate military policy? was Amer saved by luck or grace of God? D 31 p 80-79
